Hydraulic Powered Tail Gate Auger

Easy Load Tarping

•
Dependable & Positive
Hydraulic Power

•
Large 6" Auger

•
Optional Brush Auger
Flighting for Delicate Grains

Route 1 • 10881 McArtor Rd. • DODGE CITY, KANSAS • 620-225-0263

MY-D HAND-D

Gas filled assist cylinder for easier raising and lowering of the top auger extension. NO dangerous springs to corrode or break!

Handy clean-out door for emptying the hopper.

Slide gate for regulation of grain flow can also be closed from the drill to allow the auger to empty before shutting the unit off.

Flared receiving hopper to allow installation without modifications to most truck-bed gates!

Easy mounting with only two bolts that secure the auger assembly to the back of the truck. No pins to work loose or allow the auger assembly to vibrate while in transit.

The unit is mounted completely on the exterior of the truck to allow for full tarping of the load.

The 12-volt control switch that controls the hydraulic solenoid switch is mounted on the end of the telescoping downspout.
